Zine Thesaurus of Subject Terms – October 2013

All of the subject terms in the catalogue have been organized by common themes and groups in a Zine Thesaurus. The Zine Thesaurus is a good place to look up subject terms because you can see all similar and related terms together and get ideas for other terms to use. This is a print copy of the Zine Thesaurus.

In the thesaurus there is an entry for each subject term in bold with similar or related terms listed below it. The different types of similar terms are:

Broader Term (BT): a broad category that the term can placed it. For example, health care is the broad term for alternative medicine and alcohol is the broad term for beer.

Narrower Term (NT): a more specific term that can be seen as a part of a broader term. For example, alternative medicine is a narrower term for health care and beer is a narrower term for alcohol.

Related Term (RT): a term that is related in meaning. For example, pregnancy is a related term for childbirth and homelessness is a related term for poverty.

Don't worry too much about these different types of terms. They're only a way to organize the subject terms together but don't matter as much when you're cataloguing. The main thing to understand is that the Zine Thesaurus displays similar and related terms together to make it easier to find terms for cataloguing.

Some subject terms will also have **Scope Notes** (SN). Scope notes are definitions of terms or instructions on how and where they should be used. These are only included where it is necessary. For example, the Zine Thesaurus includes scope notes for the terms prison abolition, prison resistance, and prison activism, because these are all terms that are similar but have slightly different meanings and should be used in different contexts.

Other types of terms listed below subject terms are USE and USE FOR terms. These are important to
understand because they indicate terms that should not be used in the Anchor Archive catalogue. If a
term is listed and below it says "USE" and indicates a different term, you should use that
different term instead. Then a term is listed and below it says "USE FOR" and indicates a
different term, you should use the main term instead of the different term. For example, there is an
entry "pro-life movement USE anti-choice movement," which means that the term "anti-choice
movement" should be used instead of "pro-life movement." There is also an entry for "anti-choice
movement USE FOR pro-life movement," which also means that the term "anti-choice movement"
should be used instead of "pro-life movement."

If you disagree with any of the terms that have been chosen for the Thesaurus or with any of the relationships that have been established between the terms, please contact anchorarchive@gmail.com. The Thesaurus is currently being reviewed and updated, and feedback is always welcome.
